NORTEC®

NORTEC® CLEAN DATA SHEET

Product Description

NORTEC® CLEAN is an environmental-friendly low alkaline cleaner that is suitable for daily cleaning and maintenance of cementitious surface areas. Dirt is being removed without leaving any residue or making the floor appear dull. No extra rinsing is required.

Areas of Application

- Commercial and industrial concrete, dry-shake and screed surfaces
- Decorative concrete
- Stoneware coverings and tiles
- Walls and floors indoors and outdoors

When in doubt about suitability on other surfaces, test the cleaner in a less visible area prior use.

Instructions for Use

Sweep and remove loose dirt from the surface area and edges that need to be cleaned. *NORTEC® CLEAN* can be applied manually with a mop or an automatic scrubbing machine.

Apply cleaning solution (8 ml/l) on the surface, soak, scrub and remove without residue by vacuuming. Depending on the degree of soiling, allow the cleaning solution to soak for some time before removing it. Avoid drying of the surface at higher temperatures before cleaning solution is being removed by adding additional water. A second application may be necessary if surface is heavily soiled.

On densified and power troweled concrete floors, black or brown pads can be used at an early stage to develop sheen or to remove heavier dirt. For regular maintenance, less aggressive pads (green or blue) or red pads for polished floor should be sufficient.

The temperature (air and surface) should be between 5 °C and 30 °C. Do not apply at freezing temperatures or when ground is frozen. Let the area dry after the cleaning process is completed. Clean tools and maintenance equipment based on manufacturer guidelines. To minimize new soiling, also clean door mats in entrance areas or other dirt-trapping zones according to manufacturer specifications.

Storage

Store product in a well-ventilated, cool and dry place at temperatures between 5 °C and 40 °C. Protect from freezing. Do not open cap until ready to use. Do not mix cleaner with other chemicals. Store unused material in the enclosed original container. Use within the next 24 months. Slightly agitate the material in case of gel development. This has no influence on the cleaning effect or the shelf life of the product.

Safety

Information provided on the environment and safety apply to the concentrated product. Due to the pH-value of the concentrate, protective measures listed in the safety data sheet must be observed.

Technical Properties

Form of Delivery: 5 l, 10 l, 20 l, 208 l, 1040 l, liquid

Color: characteristic green

Odor: odorless

pH-Value: ≈11, application solution ≈9

Dosage: 8 ml/l

Our general terms and conditions of sale and delivery apply.
